

Climate Mondays - KlimaMontag

Demonstration for Climate Protection

First Monday of each month

Alexanderplatz
near the Weltzeituhr

18:00

from Berlin4Future

Who are we?

- We are Berliners who recognize the seriousness of the climate crisis.
- We want climate change action to be at the top of the agenda.
- We organise public actions and demonstrations for climate protection and justice.

Why are we protesting?

Averting man-made global warming is one of the most urgent challenges of our time. Germany has the opportunity to set an international example.

However, the Federal Government is allowing the limited remaining available time to pass without necessary actions - at the expense of our and all future generations.

Therefore, we must take responsibility for protecting the climate and our living environment! Join the "Climate Monday" demonstrations!

Consequences are apparent

We demand action now!

Join In!

Would you like to participate? Then write to us or directly join our Telegram chat group.

Groups, associations and companies are also welcome.

Together we can show that effective climate protection is being called for across society.
